**SHIP[®]
SOLUTIONS**

who are we.

Golf Ship Solutions company starts its activities in the maritime maintenance and supplies segment, through the CEO, Adler Moreira Gois. Together with his team of collaborators, they bring youth, proactivity and experience. In this way, Golf's enters a competitive market, offering **safety, quality and cost-effectiveness** as its vision and these guides through all decisions, thus strengthening the relationship with its customers and employees.

Our team has a work plan and actions to serve the market due to its main qualities: **well-being, leadership, committed and trained people for its customers.**

With this, the company is committed to its employees, who will be trained and qualified to work according to the safety standards required by authorities and companies. Golf trains its entire team with a resource called **CRM (Corporate Resource Management)**, which assesses errors and improves communication, thus increasing safety and well-being.

We also create what we call "stones", which are goals outlined throughout the week, month, quarter and year, where we analyze our operations, mitigate errors and strengthen our links with employees and customers.

our team.

services.

Golf's focuses on working with material supply, ranching and naval maintenance.

Supply

Grocery items;

PPE supplies;

Salvage supplies;

Office supplies;

Operational supplies
